Segments and Cash Generating Units (CGU's)

The previously reported segments and CGUs of New Zealand and Australia have been split in the second half the 2024 financial year, into the new segments and CGUs of New Zealand, Australia and Rocklabs.

As a result of a number of changes in the Executive and Leadership Teams in 2024, the responsibilities of the global team were updated to align with the revised Group structure and associated responsibilities. Regional Directors have oversight and responsibility for the redefined segments and CGUs of New Zealand, Rocklabs, Australia, Europe, USA and China. All internal reporting has been aligned to these revised segments and CGUs. The monitoring of cash inflows has also been aligned due to changes in the grouping of assets resulting in a new Rocklabs asset group that is independent of the other CGU's.

As a result of the split of New Zealand and Australia into New Zealand, Rocklabs and Australia, the 2024 reported segments and CGUs of New Zealand and Australia have been split out in Notes 2 Revenue and 3 Segment information in order to report comparative figures for the new segments and CGUs of New Zealand, Australia and Rocklabs.

5. FINANCIAL INSTRUMENTS

The Group enters into foreign currency forward exchange contracts to hedge trading transactions, including anticipated transactions, denominated in foreign currencies.

Derivatives are initially recognised at fair value on the date the derivative contract is entered into and are subsequently re-measured to their fair value at each reporting date. The resulting gain or loss is recognised in profit or loss unless the derivative is designated and effective as a hedging instrument, in which event, the timing of the recognition depends on the nature of the hedge relationship.

The Group designates certain derivatives as hedges of the fair value of firm commitments (fair value hedge) or as hedges of forecast future sales (cash flow hedge). Open firm commitments reflect contractual agreements to provide goods to customers at an agreed price denominated in a foreign currency on specified future dates.

The Group has categorised these derivatives, both financial assets and financial liabilities, as Level 2 under the fair value hierarchy contained within NZ IFRS-13.

The fair value of foreign currency forward exchange contracts is determined using a discounted cashflow valuation. Key inputs include observable forward exchange rates, at the measurement date, with the resulting value discounted back to present values.

There have been no changes in valuation techniques used for foreign currency forward exchange contracts during the current reporting period.

There were no transfers between fair value hierarchy levels during either the current or prior periods.

The fair value of financial instruments not already measured at fair value approximates their carrying value.

The fair value of foreign exchange contracts outstanding is recognised as other financial assets/liabilities.
