Automate the process of pulling pelts

Scott Final Puller pairs with a Scott Shoulder puller to form a complete pelt removal solution without human involvement.

Complete pelt removal

- ☐ Eliminate WHS risk by removing labour from this arduous task. (fully automatic - no loading required).
- ☐ Achieve throughput efficiency with fully automated pulling up to 13+ per minute.
- ☐ Floor mounted for simple installation. Drop pelt through hole in floor or onto conveyor.
- ☐ Adapts to most existing chains without expensive plant upgrades.
- ☐ All pelt types, woolly and shorn. Goat and Bobby calf capable.

Quality, safe reliable pelt pulling.

Scott MILMEQ final puller technology has been used extensively in industry for decades and is simple, reliable and designed to achieve a high level of carcase quality for carcases that are the most difficult to pull.

Suitable for most existing chain processes and workup configurations.

Eliminates risk of back shoulder and torso strain injuries as well as RSI by removing staff from this task.

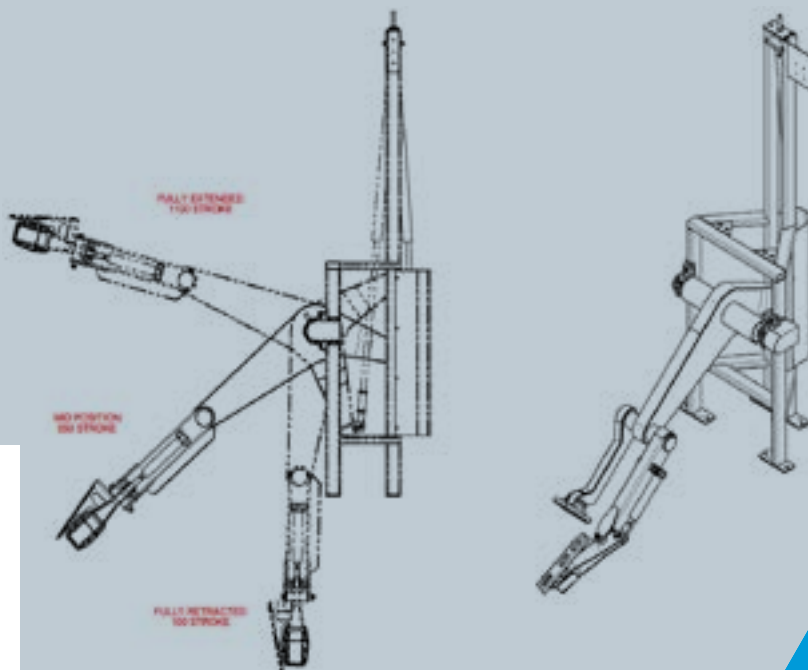

Where throughput is critical, reliable automated pulling at up to 13+ carcasses per minute delivers high plant and throughput efficiencies.

Pairs with the Scott MILMEQ VIP or MKII shoulder pullers to deliver a complete pelt removal system. Suitable for goat and Bobby calf processing.

*Developed in collaboration
with Meat & Livestock Australia*
